Introduction

The Sovereign Trust ("Trust") electronic communications systems and equipment are intended to promote effective communication and working practices throughout the business and are critical to the success of our provision of excellent service.

This policy does not form part of any employee's terms and conditions of employment and is not intended to have a contractual effect. It is provided for guidance to all members of staff at the Trust who are required to familiarise themselves and comply with its contents. The Trust reserves the right to amend its content at any time.

This policy outlines the standards that the Trust requires all users of these systems to observe, the circumstances in which the Trust will monitor the use of these systems, and the action the Trust will take regarding any breaches of these standards.

Staff use and monitoring of the Trust's electronic communications systems are likely to involve the processing of personal data. Therefore, it is regulated by the UK General Data Protection Regulation (UK GDPR), and all data protection laws and guidance are in force.

Staff are referred to the Trust's Data Protection Policy for further information. The Trust is also required to comply with the Regulation of Investigatory Powers Act 2000, the Telecommunications (Lawful Business Practice) (Interception of Communications) Regulations 2000 and the principles of the European Convention on Human Rights incorporated into U.K. law by the Human Rights Act 1998.

All staff are required to comply with the provisions set out in this policy at all times to protect the Trust's electronic systems from unauthorised access or harm. Breach of this policy will be regarded as a disciplinary offence and dealt with under the Trust's disciplinary procedure. In serious cases, it may be treated as gross misconduct, leading to summary dismissal.

The Trust has the right to monitor all aspects of its systems, including data stored on its computer systems, in compliance with the UK GDPR.

This policy mainly concerns the use (or misuse) of computer equipment, e-mail, internet connections, telephones, iPads (and other mobile device tablets), Smartphones, laptops, Chromebooks, mobile phones, and voicemail, but it also applies to the use of fax machines, copiers, scanners, and the like.

Equipment Security and Passwords

All staff are responsible for the security of the equipment allocated to or used by them and must not allow anyone else to use it unless it is in accordance with this policy.

Passwords are unique to each user, and staff are required to select a password that cannot be easily broken and which contains at least 8 characters, including numbers, letters and special characters. All passwords should be considered complex.

Passwords must be kept confidential and must not be made available to anyone else unless authorised by a member of the Senior Leadership Group, who will liaise with the Chief Information Officer as appropriate and necessary. Any member of staff who discloses his or her password to another employee in the absence of express authorisation will be liable to disciplinary action under the Trust's Disciplinary Policy and Procedure. Any member of staff who logs on to a computer using another member of staff's password will be liable to disciplinary action up to and including summary dismissal for gross misconduct.

If given access to the Trust e-mail system or to the Internet, staff are responsible for the security of their terminals. Staff are required to log off when they leave the terminal unattended or when leaving the office to prevent unauthorised users from accessing the system in their absence. The Senior Leadership Group and/or the Chief Information Officer may do spot checks from time to time to ensure compliance with this requirement.

Staff should be aware that if they fail to log off and leave their terminals unattended, they may be held responsible for another user's activities on their terminal in breach of this policy, the Trust's Data Protection Policy and/or the requirement for confidentiality in respect of certain information.

Logging off prevents another member of staff or a pupil from accessing the system in the user's absence and may help demonstrate that the user was not the party responsible in the event of a breach in the user's absence.

Staff without authorisation should only be allowed to use terminals under supervision. Desktop PCs and cabling for telephones or computer equipment should not be moved or tampered with without first consulting and obtaining the express approval of the Chief Information Officer.

On the termination of employment for any reason, staff are required to provide a full handover detailing the drives, folders and files where their work can be located and accessed. The Trust reserves the right to require employees to hand over all Trust data held in computer-useable format.

Members of staff who have been issued with a laptop, iPad (or other mobile device tablets), Smart Phone or any other device (i.e., USB stick) must ensure that it is kept secure at all times, especially when travelling. Passwords must be used to secure access to data kept on such equipment to ensure that confidential data is protected in the event that the device is lost or stolen. Staff should also observe basic safety rules when using such equipment, e.g., ensuring that they do not use or display such equipment in isolated or dangerous areas. Staff should also be fully aware that if equipment is used on public transport, documents can be easily read by other passengers. If staff take devices off-site, they should follow the Home Working Policy.

Systems Use and Data Security

Members of staff should not delete, destroy or modify any of the Trust's existing systems, programs, information or data which could have the effect of harming or exposing to risk of harm the Trust, its staff, students, or any other party.

All staff are prohibited from downloading, installing, or running software from external sources without obtaining prior authorisation from the Chief Information Officer, who will consider bona fide requests for work purposes. Please

note that this includes instant messaging programs, screen savers, photos, video clips, games, music files, and any documents or communications from unknown origins.

All staff need to inform the Chief Information Officer and CEO before sharing data with third parties so the Trust can carry out a Data Protection Impact Assessment (DPIA).

Where consent is given, all files and data should always be virus-checked before they are downloaded onto the Trust's systems. If in doubt, the employee should seek advice from the Chief Information Officer or a member of the Senior Leadership Group.

The following must never be accessed from the network because of their potential to overload the system or to introduce viruses:

- Audio and video streaming;
- Instant messaging;
- Chat rooms;
- Social networking sites; and
- Webmail (such as Hotmail or Yahoo).

No device or equipment should be attached to our systems without the prior approval of the Chief Information Officer or the Senior Leadership Group. This includes but is not limited to any Smartphone or telephone, iPad, laptop (or other mobile device tablet), USB device, iPod, digital camera, infrared connection device, or any other device.

The Trust monitors all e-mails passing through its systems for viruses. Staff should be cautious when opening e-mails from unknown external sources or where, for any reason, an e-mail appears suspicious (such as ending in '.exe'). The Chief Information Officer should be informed immediately if a suspected virus is received. The Trust reserves the right to block access to attachments to e-mail for the purpose of effective system use and compliance with this policy. The Trust also reserves the right not to transmit any e-mail message.

Staff should not attempt to gain access to restricted areas of the network or any password-protected information unless they are specifically authorised to do so.

Misuse of the Trust's computer systems may result in disciplinary action up to and including summary dismissal. For further guidance on what constitutes misuse, please see the section entitled Inappropriate Use of the Trust's Systems and guidance under "E-mail etiquette and content" below.

E-mail Etiquette and Content

E-mail is a vital business tool but often lapses inappropriately into an informal means of communication and should, therefore, be used with great care and discipline.

The Trust's e-mail facility is intended to promote effective communication within the business on matters relating to the Trust's business activities. Access to the Trust's e-mail facility is provided for work purposes only.

Staff are permitted to make occasional personal use of the Trust's e-mail facility provided such use is in strict accordance with this policy (see Personal Use below). Excessive or inappropriate personal use of the Trust's email facility will be treated as a disciplinary offence, resulting in disciplinary action up to and including summary dismissal, depending on the seriousness of the offence.

Staff should always consider whether e-mail is the appropriate medium for a particular communication. The Trust encourages all staff to make direct contact with individuals rather than communicate by e-mail wherever possible to maintain and enhance good working relationships.

Messages sent on the e-mail system should be written as professionally as a letter or fax message. They should be concise and directed only to relevant individuals on a need-to-know basis. The content and language used in the message must be consistent with the Trust's best practices.

E-mails should never be sent in the heat of the moment or without first checking the content and language and considering how the message is likely to be received. Staff are encouraged, wherever practicable, to write a draft e-mail first, print it out and review it carefully before finalising and sending it. As a rule of thumb, if a member of staff would not be happy for the e-mail to be read out in public or subjected to scrutiny, then it should not be sent. Hard copies of e-mails should be retained on the appropriate file.

All members of staff should remember that e-mails can be the subject of legal action, for example, in claims for breach of contract, confidentiality, defamation, discrimination, harassment, etc., against both the member of staff who sent them and the Trust. Staff should take care with the content of e-mail messages, as incorrect or improper statements can give rise to the personal liability of staff and to the liability of the Trust in the same way as the contents of letters or faxes.

E-mail messages may, of course, be disclosed in legal proceedings in the same way as paper documents. They may also be disclosed when subject access requests arise. Deletion from a user's inbox or archives does not mean that an e-mail is obliterated, and all e-mail messages should be treated as potentially retrievable, either from the main server or using specialist software. This should be borne in mind when considering whether an e-mail is an appropriate forum of communication in the circumstances of the case and, if so, the content and language used.

Staff should assume that e-mail messages may be read by others and not include in them anything which would offend or embarrass any reader or themselves if it found its way into the public domain. The Trust standard disclaimer should always be used in every e-mail.

Staff should ensure that they access their e-mails at least once every working day, stay in touch by remote access when travelling or working out of the office and use an out-of-office response when away from the office for more than a day. Staff should endeavour to respond to e-mails marked 'high priority' as soon as is reasonably practicable.

Members of staff are strictly forbidden from sending abusive, obscene, discriminatory, racist, harassing, derogatory or defamatory messages. If such messages are received, they should not be forwarded and should be reported to a member of the Senior Leadership team immediately. If a recipient asks you to stop sending them personal messages, then always stop immediately. Where appropriate, the sender of the e-mail should be referred to this policy and asked to stop sending such material.

If you feel that you have been harassed or bullied or are offended by material sent to you by a colleague via e-mail, you should inform the Chief HR Officer, who will usually seek to resolve the matter informally. You should refer to our Equal Opportunities and Diversity Policy and the Anti-Harassment and Bullying Policy for further information and guidance.

If an informal procedure is unsuccessful, you may pursue the matter formally under the Trust's formal grievance procedure. (Further information is contained in the Trust's Equal Opportunities and Diversity Policy, Anti-Harassment and Bullying Policy and Grievance Policy and Procedure.)

General Guidance

Staff must not:

- Send any e-mail, including resending and forwarding, containing sexually explicit or otherwise offensive material either internally or externally;
- Send any e-mail communication which may be regarded as harassing or insulting. Complaints about the performance or service of other departments or individuals must be made on a face-to-face basis in accordance with a normal and courteous practice;
- Send or forward private e-mails at work that they would not want a third party to read;
- Send or forward chain mail, junk mail, cartoons, jokes or gossip either within or outside the Trust;
- Contribute to system congestion by sending trivial messages or unnecessarily copying or forwarding e-mails to those who do not have a real need to receive them;
- Sell or advertise using the systems or broadcast messages about lost property, sponsorship or charitable appeals;
- Agree to terms, enter into contractual commitments or make representations by e-mail unless the appropriate authority has been obtained. A name typed at the end of an e-mail is a signature in the same way as a name written in ink at the end of a letter;
- Download or e-mail text, music and other content on the internet subject to copyright protection unless it is clear that the owner of such works allows this;
- Send messages containing any reference to other individuals or any other business that may be construed as libellous;
- Send messages from another worker's computer or under an assumed name unless specifically authorised;
- Send confidential messages via e-mail, the internet or by other means of external communication which are known not to be secure;

- E-mail may normally only be used to communicate internally with colleagues and students (where appropriate and necessary) and externally to parents, suppliers and third parties on academic/service-related issues. Urgent or important messages to family and friends are permitted but must be of a serious nature;

The Trust recognises that it is not always possible to control incoming mail. Any material that would be considered inappropriate, unprofessional, sexually explicit, or offensive should be deleted at once. Any member of staff who finds that they are receiving such communications from known sources is responsible for contacting that source to request that such communication not be repeated.

Staff who receive an e-mail which has been wrongly delivered should return it to the sender of the message and delete the email as soon as possible to minimise any further risk to individuals whose data could be breached. If the e-mail contains confidential information or inappropriate material (as described above), it should not be disclosed or forwarded to another member of staff or used in any way. The Chief Information Officer should be informed as soon as reasonably practicable.

Use of the Internet

When a website is visited, devices such as cookies, tags or web beacons may be employed to enable the site owner to identify and monitor visitors. If the website is inappropriate, such a marker could be a source of embarrassment to the Trust, especially if a member of staff has accessed, downloaded, stored or forwarded inappropriate material from the website. Staff may even be committing a criminal offence if, for example, the material is pornographic in nature.

Staff must not access any web page or any files from the Trust's system (whether documents, images or other) downloaded from the web which, on the widest meaning of those terms, could be regarded as illegal, offensive, in bad taste or immoral. While content may be legal in the UK, it may be insufficient bad taste to fall within this prohibition.

As a general rule, if any person within the Trust (whether intending to view the page or not) might be offended by the contents of a page or if the fact that the Trust's software has accessed the page or file might be a source of embarrassment if made public, then viewing it will be a breach of this policy.

Staff should not, under any circumstances, use Trust systems to participate in any Internet chat room, post messages on any Internet message board, or set up or log text or information even on their own time.

Remember also that text, music, and other content on the Internet are copyrighted works. Staff should not download or e-mail such content to others unless they are certain that the owner of such works allows this.

The Trust's website may be found at https://www.thesovereigntrust.uk. It is intended to convey our core values and excellence in the educational sector. All staff are encouraged to give feedback concerning the site, and new ideas and inclusions are welcome. Such input should be submitted to the Senior Leadership Group in the first

instance. Only expressly authorised and designated members of staff are permitted to make changes to the website.

The Trust should refrain from texting and using systems such as WhatsApp for Trust-related matters using personal phones. The Trust require staff to use alternative systems to make contact with staff (such as emails).

The Trust has published relevant information on its own intranet for the use of all staff. All such information is regarded as confidential to the Trust and may not be reproduced electronically or otherwise for the purposes of passing it to any individual not directly employed by the Trust. Any exceptions to this must be authorised by the Chief Information Officer, who will liaise with the Senior Leadership Group as appropriate and necessary.

Personal Use of Trust Systems

The Trust permits the incidental use of its internet, e-mail, and telephone systems to send personal e-mails, browse the web, and make personal telephone calls, subject to certain conditions set out below.

Our policy on personal use is a privilege, not a right. Its effectiveness depends on its not being abused or overused, and we reserve the right to withdraw our permission or amend the scope of this policy at any time.

The following conditions must be met for personal usage to continue:

(a) Use must be minimal and take place substantially out of normal working hours (that is, during the member of staff's usual break time or shortly before or after normal working hours);

(b) Personal e-mails must be labelled "personal" in the subject header;

(c) Use must not interfere with business or office commitments;

(d) Use must not commit the Trust to any marginal costs;

(e) Use must comply at all times with the rules and guidelines set out in this policy;

(f) Use must also comply with the Trust's compliment of operational policies and procedures, including but not limited to the Equal Opportunities and Diversity Policy, Anti-Harassment and Bullying Policy, Data Protection Policy and Code of Conduct.

Staff should be aware that any personal use of the systems may also be monitored (see below), and where breaches of this policy are found, action may be taken under our Disciplinary Policy and Procedure. Excessive or inappropriate personal use of the Trust's email facility will be treated as a disciplinary offence, resulting in disciplinary action up to and including summary dismissal, depending on the seriousness of the offence.

The Trust reserves the right to restrict or prevent access to certain telephone numbers or internet sites if it considers that [personal use is excessive or otherwise in breach of this policy

Inappropriate Use of Equipment and Systems

Incidental/occasional/reasonable personal use is permissible provided it is in full compliance with the Trust's rules, policies and procedures (including this policy, the Equal Opportunities and Diversity Policy, Anti-Harassment Policy, Data Protection Policy, Code of Conduct and Disciplinary Policy and Procedure).

Misuse or abuse of our telephone or e-mail system or inappropriate use of the internet in breach of this policy will be dealt with in accordance with the Trust's Disciplinary Policy and Procedure.

Misuse of the internet may, in certain circumstances, constitute a criminal offence. In particular, misuse of the e-mail system or inappropriate use of the internet by viewing, accessing, transmitting or downloading any of the following material or using any of the following facilities will amount to gross misconduct (this list is not exhaustive):

(a)   Accessing pornographic material (that is, writings, pictures, films, video clips of a sexually explicit or arousing nature), racist or other inappropriate or unlawful materials;

(b)   Transmitting a false and/or defamatory statement about any person or organisation;

(c)   Sending, receiving, downloading, displaying or disseminating material which is discriminatory, offensive, derogatory or may cause offence and embarrassment or harass others;

(d)   Transmitting confidential information about the Trust and any of its staff, students or associated third parties;

(e)   Transmitting any other statement which is likely to create any liability (whether criminal or civil and whether for the employee or the Trust);

(f)   Downloading or disseminating material in breach of copyright;

(g)   Copying, downloading, storing or running any software without the express prior authorisation of the Chief Information Officer.

(h)   Engaging in online chat rooms, instant messaging, social networking sites and online gambling;

(i)   Forwarding electronic chain letters and other materials;

(j)   Accessing, downloading, storing, transmitting or running any material that presents or could present a risk of harm to a child.

Any such action will be treated very seriously and may result in disciplinary action up to and including summary dismissal.

Where evidence of misuse is found, the Trust may undertake a more detailed investigation in accordance with our Disciplinary Policy and Procedure. This may involve examining and disclosing monitoring records to those nominated to undertake the investigation and any witnesses or members of management involved in the disciplinary procedure.

If necessary, such information may be handed to the police in connection with a criminal investigation.
